Period for Reply

**A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM
THE MAILING DATE OF THIS COMMUNICATION.**

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

In view of Granted Petition to Withdraw Holding of Abandonment, this Office

Action Resets period for response.

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.

The changes made to 35 U.S.C. 102(e) by the American Inventors Protection Act of 1999 (AIPA) and the Intellectual Property and High Technology Technical Amendments Act of 2002 do not apply when the reference is a U.S. patent resulting directly or indirectly from an international application filed before November 29, 2000. Therefore, the prior art date of the reference is determined under 35 U.S.C. 102(e) prior to the amendment by the AIPA (pre-AIPA 35 U.S.C. 102(e)).

2. Claims 1-6, 8 are rejected under 35 U.S.C. 102(e) as being anticipated by Cho (U.S. Patent 6,636,496 B1).

With respect to claims 1-6, 8-13, 15-19, Cho discloses wireless communication network and / or for use in a base station, an apparatus for sending and receiving an acknowledgment message (See e.g. method and device, Title, Abstract), comprising: channel controller capable of assigning a common control channel (See i.e. BCCH, broadcast channel, control channel, Co. 1, Lines 32-35, RACH, FACH, acknowledgement, Co. 2, Lines 4-11) a mobile station wherein

channel controller is capable of dedicating common control channel (See e.g. Co. 1, Lines 53-56) to mobile station for a predetermined period of time (See e.g. Co. 3, Lines 32-44); and transceiver inherently coupled channel controller capable of transmitting and receiving acknowledgment message on common control channel (See e.g. Co. 7, Lines 1-11 & Co. 12, Lines 24-45).

Regarding claims 2, 9, Cho discloses base station is capable of broadcasting a paging message to mobile station (See e.g. Co. 8, Line 66 – Co. 9, Line 4, Co. 12, Lines 24-41).

Regarding claims 3, 10, 26, Cho discloses paging message comprises identification of common control channel (See e.g. PID, Co. 7, Line 64 – Co. 9, Line 4, Co. 12, Lines 24-41).

Regarding claims 4, 11, 17, Cho discloses base station inherently comprises a timer (See e.g. 217, 219, 229 7 231 of Fig. 9) associated with channel controller for regulating the time (See e.g. Co. 7, Lines 1-11, Co. 8, Lines 11-24) that common control channel is available for mobile station (See e.g. Co. 8, Lines 25-43, Co. 14, Lines 1-20).

Regarding claims 5, 12, 18, Cho discloses base station is capable of assigning common control channel to mobile station for receiving at least one message from the mobile station (See e.g. Co. 8, Lines 19-30).

Regarding claims 6, 13, 19, Cho discloses paging message provides limits for time period for receiving acknowledgment message from said mobile station (See e.g. Co. 8, Line 65 – Co. 9, Line 4).

Allowable Subject Matter

3. Claims 7, 14, 20, are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

With respect to claims 7, 14, 20, the prior art of record fails to disclose or render obvious that the paging message comprises a forward channel message including forward channel message as a reliable ACK message specifying a dedicated common control channel address and identity.

Conclusion

4. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

a) Dalal (U.S. Patent 6,633,554 B1), Discloses System And Method For Soft Handoff Setup During System Access Idle Handoff In A wireless Network.

b) Rinchiuso (U.S. Patent 6,104,709), Discloses Channel Assignment Within A Broad-Band Communication System.

c) Hamalainen (U.S. Patent 6,167,248), Discloses Data Transmission In A Radio Telephone Network.
